## Therme , whinilivi TRAINING PLAN

## 26.2 miles <br> RUN THE FIRST THIRD WITH YOUR HEAD RUN THE SECOND THIRD WITH YOUR LEGS RUN THE LAST THIRD WITH YOUR HEART

Thanks for joining the $\mathbf{2 0 2 2}$ Therme Manchester Marathon! HOKA athlete Adam Hickey has created this exclusive marathon training plan to help you cross the finish line in around 4 hours.
Everyone is unique, so please listen to your mind and body during the training cycle. Feel free to use this plan

## Level

 as a base and find a training solution that works for you.You are taking on an incredible challenge that aims to push you. Add the details of the plan into your calendar at the start of each week, to keep you focused and committed. We are really excited to see you on 3 April.

## HOW TO READ THE PLAN

Each session includes a warm-up (minimum 15 minutes) and a cool down (minimum 10 minutes)

- Rest day: can be used for strength and conditioning, stretching and active recovery such as gentle swimming, cycling or walking.
- Run day: the focus for these runs is time, not necessarily speed, so you should run at an easy pace and be able to speak comfortably when running. The times for these runs may seem daunting when you first look at the plan, but together we will build your stamina to be able to run for suggested amount.
- Intervals Day: days that include some faster running interspersed with recovery periods so that you can maintain the quality. The total time allocated for interval days includes time to warm up and cool down. For example $45^{\prime}$ : $10 \times 60 \mathrm{sec}$ means a 45 minutes training session, that is made up of a warm up, 60 seconds of running effort and 60 seconds of walk recovery, repeated 10 times, followed by a cool down.
Effort and sprint: those terms are mentioned few times in the plan. The standard exertion for your runs should be a comfortable pace where you are able to speak comfortably. Unless you see that 'effort' is listed then you need to push that much harder, and where 'sprint' is listed run at your fastest speed.
